Re: June 2026 NAIC Cybersecurity Incident

Dear President White:

On behalf of the American Property Casualty Insurance Association (APCIA), we write in response to the NAIC cyber breach first reported on June 17, 2026. We understand that an unauthorized third party gained access to the NAIC's PeopleSoft system and that a significant volume of confidential information may have been accessed or otherwise compromised.

As a leading voice of the property casualty insurance industry, APCIA is hearing directly from member companies that are seeking clear, timely, and authoritative information regarding the scope of this incident and its potential implications. Accordingly, this letter is intended both as a strong offer of assistance and as a request for prompt and continuing guidance.

First, APCIA stands ready to assist the NAIC in mitigating any consequences from this event in every practical way during this situation. We are prepared to assist with coordinated communications, amplification of key messages, and outreach to ensure that accurate information is distributed quickly and consistently across the industry. We view this as a critical moment for alignment and will mobilize our resources to support your efforts as needed.

Second, and importantly, we need clear direction from the NAIC so that we can responsibly and consistently advise our member companies. To do so, we appreciate your guidance on what information, interim recommendations, or actions we should be communicating at this time. In addition, we ask for clarity on how best to stay informed of ongoing developments so that we can ensure our members receive timely, accurate updates as the situation evolves.

We want to be clear: we are fully committed to being a constructive partner and to aid both the NAIC and our member companies through this incident. To do so effectively, we depend on your guidance to ensure our communications and engagement are aligned with your expectations.

Please do not hesitate to contact me or Hilary Segura (**hilary.segura@apci.org**) directly if there are specific ways we can assist. We would also welcome the opportunity to connect with you or NAIC staff at your earliest convenience to coordinate next steps.

Best regards,

Adam R. Shores

Senior Vice President, State Government Relations
